Summary

I am a Computer Science senior at the University of Florida with a passion for software development and a robust background in various programming languages and tools such as C++, C, Java, SQL, JavaScript, Python, MERN Stack, HTML, CSS, MatLab, Git, and Material UI. Having led a full stack software engineering project, managed IT services, and provided comprehensive technical support, I possess a strong blend of technical skills, leadership, and customer service. My bilingual proficiency in English and Spanish, combined with my ability to create data-driven solutions, positions me to make a significant impact in a software development role. Over my academic and professional journey, I have received numerous honors and awards that recognize my technical expertise, leadership potential, and academic accomplishments.

Experience

Full Stack Software Engineer

Youth In Transformation

May 2023 - Present (4 months)

Led the development of the 'Youth in Transformation' app, a comprehensive platform to track student progress, communication, and tutoring data. Utilized MERN stack technologies to enable data-driven decision making and enhance the effectiveness of after-school academic intervention programs in South Africa.

Implemented features for profile management, reporting, multi-admin access, and group communications to streamline operations, improve student-tutor engagement and access to resources.

Services Manager

The ODP Corporation

Jan 2020 - Dec 2021 (2 years)

As a Services Manager, the role involved leading a team to achieve goals and deliver exceptional customer service through motivation, counseling, and product knowledge education.

Oversaw the IT Tech Services Department at our location, administering end-to-end operations, strategic planning, and effective problem resolution; demonstrated competency in IT management and ensured seamless technical support for optimal business continuity.

IT Technician

Compucom

Jul 2018 - Dec 2019 (1 year 6 months)

Provided comprehensive IT support, including diagnosing, troubleshooting, and resolving a wide range of hardware, software, and network issues.
